Department of Electronic and Information Engineering

EIE2111 Lab 9: GUI

(Deadline for Submission: Check the course information)

Introduction

This laboratory exercise is designed to give you hand-on experience in GUI.

Question

You are required to design a simple GUI game: guess a card. At the beginning, a form shows the back of a card with two radio buttons and one button. Moreover, your program randomly generates an integer between 1 (it means the card is Spade Ace) and 2 (it means the card is Heart Ace). Then the user selects a radio button and then clicks the button “Guess” to guess (see Figure 1). After clicking the button, the form shows the answer (i.e., the face of the card). If the guess is correct, a dialog box is displayed with the message “Correct” (see Figure 2); otherwise, a dialog box is displayed with the message “Wrong” (see Figure 3). All card images can be found in the course web site.

Instructions

- You are required to submit your programs (the whole projects created in Microsoft Visual Studio) to Blackboard. Zip all of them into a single file.
- The deadline of the submission: **Check the course information.**
